The team at Erie Precision Grinding is excited to share our offering! We have a new location, and exciting new equipment! Please feel free to contact us any time with question or inquiries!

Our Studer S33 CNC Cylindrical Grinder has a work piece capacity of 13.7" x 38" between centers. We process a variety of work pieces and materials, so don't hesitate to inquire about our capabilities!

The Kellenberger Kel-Vista at Erie Precision Grinding has the capability to grind not only outside diameters, but faces and inside diameter bores as well. With a 13.8" swing, 40" overall length capacity and approximately 26" of effective grind length there are many possible configurations to process your work piece. With a variety of workholding options, call or email us your print today and we will work toward a solution to your high tolerance grinding needs!

Our Chevalier CNC Surface grinder has an impressive 50" x 120" table capacity! The latest in grinding technology along with our climate controlled environment allow us the ability to hold tight tolerances our customers rely on. Call or E-mail us with your grinding inquiry today! Lets see what we can do for you!

With a variety of manual machine tools as well, we can adapt to handle most any workpiece configuration. Call Today!

"QUALITY AND SERVICE WITH EVERY JOB"
